

What is claimed is:

1           1. Automatic dishwasher, especially for built-in kitchenettes, comprising  
2 a cabinet (10) and equipped with a front door (11) that seals the wash tub (18)  
3 housing at least one first (20) and one second (21) spray arm for washing the  
4 dishes placed in at least one rack (19), said tub being closed on the bottom by a  
5 downward sloping panel (22) that directs the wash water into a sump hopper (23)  
6 which serves to collect and drain the water, characterized in that the first spray  
7 arm (20) essentially extends coaxially with the sump hopper (23) while the second  
8 spray arm (21) is positioned above the sloped panel (22) with its axis of rotation  
9 extending at a right angle to said panel.

1           2. Dishwasher as in claim 1, characterized in that the sump hopper (23)  
2 serving to collect and drain the wash water is located in an off-center position on  
3 the bottom of the wash tub (18).

1           3. Dishwasher as in claim 1 or 2, characterized in that the plane of  
2 rotation of the second spray arm (21) partly extends underneath that of the  
3 primary spray arm (20).

1           4. Dishwasher as in one of the preceding claims, characterized in that the  
2 door (11) extends across the full width of the cabinet (10) and that one single rack  
3 (19) serves to accommodate a standard load of dishes.

1           5. Dishwasher as in one of the preceding claims, characterized in that the  
2 door (11) is a solid component provided with a trim panel (15).

1           6. Dishwasher as in one of the preceding claims, characterized in that the  
2 door (11) features a transparent window (16) and an outside handle (17).
